

Turn your network inside out - Without turning your business upside down!

Make life easier for employees. And increase productivity.

G/On™ lets you turn your network “inside out” by making it easy for people to securely access business applications **anywhere, anytime** from home, on the road or when visiting partners and clients, without having to worry about connectivity issues.

Lighten the load on your IT staff. And reduce IT costs.

G/On™ includes everything you need to **quickly** make applications available to remote users and eliminates the need for additional solutions to make the whole process secure.

Increase the value of your IT investments. And boost business collaboration.

G/On™ lets you quickly and **cost-effectively** provide self-service business collaboration – while avoiding the hassle and risks of connecting two independent networks.
